Subject: FWS RECOMMENDED ADDITIONS TO WQ PARAMETERS

JUDY:

ATTACHED ARE USFWS RECOMMENDED ADDITIONS/CHANGES (AND REASONS) TO ENVIRONMENTAL WATER QUALITY PARAMETERS OF CONCERN FOR THE CALFED WATER QUALITY PROGRAM. THESE ARE EXCERPTED FROM OUR COMMENTS ON THE WATER QUALITY PROGRAM COMPONENT REPORT (AUG 97 DRAFT) WHICH I SENT TO RICK IN SEPT. (SENT "OFFICIALLY" TO LESTER SNOW IN OCT).

WE RECOMMEND THAT: NUTRIENTS (NITROGEN AND PHOSPHOROUS) BE ADDED AS AN ENVIRONMENTAL PARAMETER(S) OF CONCERN.

LIGHT ATTENUATION/PENETRATION OR WATER CLARITY SHOULD BE INCLUDED (WITH TURBIDITY OR SEPARATELY) AS AN ENVIRONMENTAL PARAMETER OF CONCERN.

WE WILL PRESENT OUR REASONS/EVIDENCE FOR THESE RECOMMENDATIONS AT THE PARAMETERS ASSESSMENT TEAM MEETING ON DEC. 3.

THANKS,

DOUG MORRISON  
USFWS CALFED COORDINATOR  
(FWS e-mail: douglas\_morrison@fws.gov)
